

Q4 2019 SuccessFactors Review

Recruiting

- Anisha Rajput

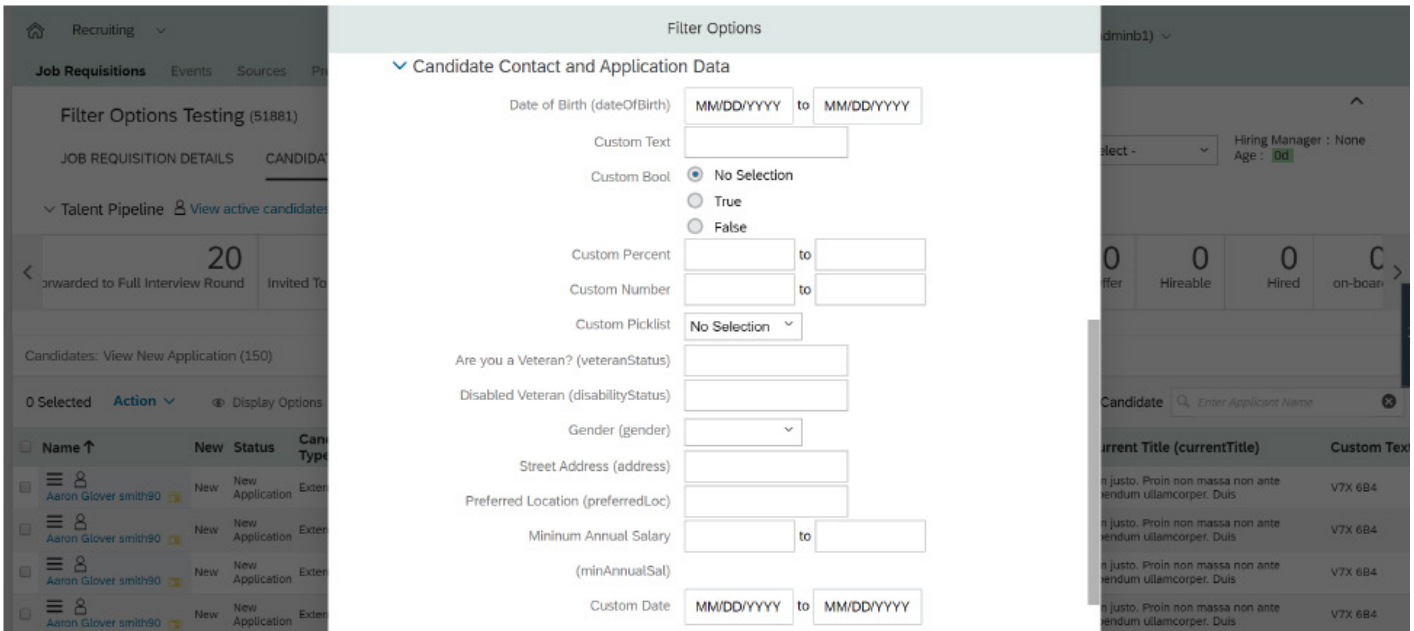

SAP SuccessFactors have introduced exciting features in this release. These features will add great value to both clients and implementation partners. It brings great joy to highlight some of my personal favourites in this article.

Business Rules on Job Application

The first part of Business Rules were introduced in a previous release, this has been further enhanced for Recruiters with admin permissions. Recruiters are now able to classify Business Rules for fields of an Application template. Each rule on Job Application can be set to either be executed or triggered by an action, when a candidate accepts or declines an online offer letter or by DocuSign. This will simplify the business process and make it more seamless for Recruiters. This can be enabled on the instance level and be linked to a field on an application template.

Enhanced Filter Options

This feature, Enhanced Filter Options (*Figure 1*), gives a huge benefit for Recruiters to search the best and suitable candidates with many and multiple filter options including custom fields. Users can search by key words for candidates who have applied for a job. To ensure this is set up correctly, all relevant fields must be set up in Candidate Profile Template via Manage Templates tool.

(Figure 1: Filter Options)

Quick Apply

This next feature is really exciting as it allows candidates to apply in fewer clicks and allows a candidate to sign-in or create a profile at a later stage. Along with this, Recruiters will be able to create a Quick apply requisition and

be able to enable or disable this option at any stage of the process in the Job Requisition.

For Candidates, Quick apply will be simplified. Below screenshot (Figure 2) displays the Quick apply screen.

(Figure 2: Candidate Quick Apply)

Job Posting Rules

The Posting Rules will accelerate the posting process for Recruiters. Admins will be able to create rules which allows automatic posting

based on pre-select Posting Profile (*Figure 3*) taken from the content of the job requisition fields. This feature will be available to all the clients using Recruiting Posting from November 14th, 2019.

The screenshot shows the SAP Admin Center interface for 'Manage Recruiting Posting'. The page title is 'Posting Profile Preselection Rules' with a subtitle 'Create rules that automatically assign a posting profile to a job posting following a set of criteria.' There is a search bar for 'posting profile' and two buttons: 'Set priority' and 'Create rule'. A table lists three rules:

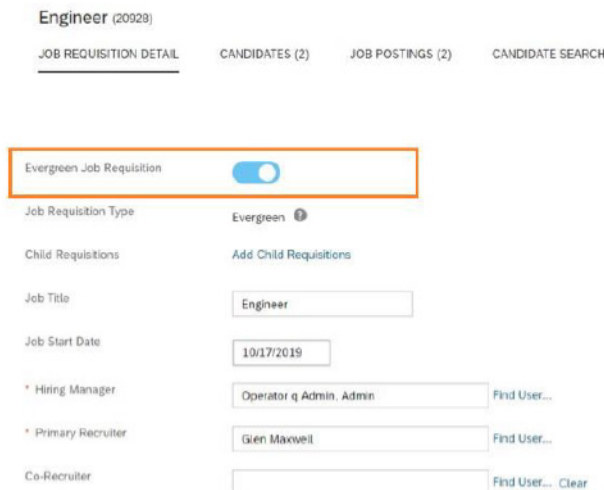

Priority	Posting Profile	Summary	
1	SAP France	Country is France	
2	SAP France - Permanent Contract	Country is France and contract type is permanent	
3	SAP France - Student contract	Country is France and contract type is apprenticeship or internship	

(Figure 3: Posting Profile Preselection Rule)

Evergreen Requisitions

An Evergreen Requisition (*Figure 4*) is brought to companies with a high volume of positions or the requisitions which are hard to fill and have a need to be made available for a longer period. Recruiter will be able to create a child

requisition which will be linked to Evergreen Requisition. Recruiters can forward a candidate from an Evergreen Requisition to the child requisition. This feature helps Recruiters to analyse the best candidates and be able to report on both levels.

The screenshot shows the 'Engineer (20929)' job requisition detail page. The 'Evergreen Job Requisition' toggle is turned on. The 'Job Requisition Type' is set to 'Evergreen'. The 'Child Requisitions' section has a link to 'Add Child Requisitions'. The 'Job Title' is 'Engineer', 'Job Start Date' is '10/17/2019', 'Hiring Manager' is 'Operator q Admin, Admin', and 'Primary Recruiter' is 'Glen Maxwell'. There are 'Find User...' buttons for the manager and recruiter fields, and a 'Clear' button for the Co-Recruiter field.

(Figure 4: Evergreen Job Requisition)

Few Minor Enhancements Worth Mentioning

- A candidate will only appear in the search if a candidate has accepted the data privacy consent statement.
- Email Verification has been enabled for Candidate Account Simplification. This feature will prompt a candidate to verify their email address when creating a Candidate Profile.
- A job posting form will be prepopulated with the job requisition content, based on the field completion rule configuration.

Finally, a quick reminder to our readers about the features that will be deprecated (replaced) in 2019:

- Web focus Advanced Analytics UI and Recruiting Dashboard are scheduled for end of 2019.
- Recruiting Dashboard in Recruiting Marketing will be depreciated by end of 2019.
- SAP Media Team will no longer support implementation tasks after Q4 Release.

Conclusion

There are few new major features coming our way and these are certainly something exciting to look forward to. SAP are releasing a lot of positive changes with benefits for users; the full details of Q4 release are available on SuccessFactors community, but in the meantime, I hope you have enjoyed reading some of my personal highlights.

How Can We Help?

Zalaris excels in delivering comprehensive HR and payroll services across the UK, Northern Europe, the Baltics and Poland. Our industry leadership position, however, goes beyond the borders and constraints of other providers to enable what matters most to our clients: maximising the value of human capital through excellence in HR processes.

- **Scoping Services** - for if you are thinking of moving to the HCM Cloud but are unsure of where to start.
- **Support Services** - for if you are already using SAP SuccessFactors and want a flexible support partner.
- **Release Management Services** - for if you are struggling to take advantage of the quarterly innovations in SAP SuccessFactors.
- **Business Process Services** - for if you are looking for operational support with your HCM processes.
- **Training Services** - for if you are not getting the most out your SuccessFactors system.

Zalaris UK&I (part of the Zalaris ASA group) is the operating name of Zalaris Consulting UK Limited which is a private limited company registered in England, number 03538201, with registered address 62 Wilson Street, London, England, EC2A 2BU.
